 +92 317 694 7473

 Lahore, Pakistan

Senior DevOps & Release Engineer with 5+ years of experience architecting automated CI/CD pipelines, containerized environments, and high-availability infrastructure across cloud and distributed platforms. Specialized in end-to-end software delivery using **GitHub Actions**, multi-language build lifecycles across **C++ (CMake)** and **JavaScript/TypeScript (NPM)**, and cross-platform releases. Proven track record engineering secure, compliant infrastructure for UAE Government initiatives (**DGE-Mawaheb**), sovereign AI platforms (**Takafo**), commercial enterprises (**ASMS / Skyworth**), and surgical robotics software. Expert in Docker container optimization, Terraform, Ansible, Linux systems engineering, and full-stack observability with Prometheus and Grafana.

🔧 CORE COMPETENCIES & TECHNICAL SKILLS

 **CI/CD & RELEASE ENGINEERING**

 GitHub Actions (Reusable / Matrix)

 CMake & C+

 TypeScript / NPM

Semantic Versioning

Artifact Signing & Packaging

 **CONTAINERS & ORCHESTRATION**

Docker (Multi-Stage Builds)

 Kubernetes (AKS / K3s)

Helm Charts

Layer Caching

GHCR / Docker Hub

INFRASTRUCTURE AS CODE & AUTOMATION

Terraform

Ansible Roles/
Playbooks

Python
Automation

Advanced
Bash

Git Flow

CLOUD PLATFORMS & MICROSERVICES

AWS

Azure

Nginx Reverse Proxy

SSL/TLS Security

High-Availability Design

LINUX SYSTEMS & NETWORK SECURITY

Ubuntu / Debian /
RHEL

Kernel Performance Tuning

IPsec Site-to-Site VPNs

Firewall Hardening (iptables/UFW)

Network Diagnostics

OBSERVABILITY, SRE & TELEMETRY

Prometheus

Grafana
Dashboards

Alertmanager

ELK Stack

MTTR Reduction (-60%)

PROFESSIONAL EXPERIENCE

Senior DevOps & Cloud Engineer • [IBHC.ai \(Inception AI\)](#)

Sep 2025 – Present • Remote / Hybrid

- Architected and managed enterprise multi-stage **GitHub Actions** and Azure DevOps CI/CD delivery pipelines for production platforms including **DGE-Mawaheb (UAE Government)**, **Takafo**, **Muqabla**, and **RestHero**, achieving sub-10 minute automated releases.
- Implemented test-driven deployment (TDD) validation gates, container security scanning, and automated rollback controls, preventing defect leakage into staging and production.
- Optimized Docker container builds utilizing multi-stage Dockerfiles and layer caching, **cutting image sizes by 65% and build durations by 50%**.
- Automated cloud infrastructure provisioning via modular **Terraform** and **Ansible** scripts, ensuring reproducible isolated environments across Dev, Staging, Production, and DR.
- Engineered full-stack telemetry using Prometheus, Grafana, and Log Analytics, **reducing incident MTTR by 60%** and sustaining a strict **99.9% uptime SLA** for Takafo sovereign AI.
- Embedded automated security compliance scanning with **AzureProof** to validate live infrastructure configurations against SOC 2 and zero-trust controls.

Senior DevOps & Infrastructure Engineer • [Aslase](#)

Jul 2025 – Present • Remote / Hybrid

- Engineered automated continuous delivery and infrastructure operations for 8+ commercial platforms including **ASMS (Skyworth USA)**, **Black Door Limo**, and **Humentra.ai**, **reducing release cycle times by 40%**.
- Built and managed automated compilation, linting, and semantic versioning workflows for TypeScript and Node.js packages to internal registries and NPM ecosystems.
- Administered containerized Docker Compose workloads, Nginx reverse proxies, SSL/TLS certificate automation, and Linux server maintenance with zero unplanned downtime.
- Automated cross-platform application release workflows, orchestrating tag-triggered builds, code signing, and artifact distribution.

Infrastructure & Systems DevOps Engineer • [THINK Surgical](#)

Feb 2023 – Dec 2023 • Remote (USA)

- Developed and maintained native **C++ build pipelines using CMake**, GCC, and Clang toolchains for surgical robotics R&D software on Linux test environments.
- Automated continuous integration testing runs and binary artifact packaging for mission-critical software verification.
- Automated physical VMware hypervisor and Linux VM provisioning using modular **Ansible playbooks**, **cutting environment setup times from 3 hours to 15 minutes**.
- Authored Software Validation Protocols (SVP) and Verification Reports (SVR) satisfying FDA 21 CFR Part 11 regulatory standards.

On-Premise & Cloud Infrastructure Engineer • [Technonies](#)

Mar 2022 – Oct 2024 • Remote

- Automated Kubernetes cluster deployments and GitOps workflows on Hetzner Cloud, **dropping provisioning time from 4 hours to under 20 minutes**.
- Engineered high-availability PostgreSQL (Patroni) and MariaDB Galera database clusters, maintaining **99.95% production database availability**.
- Administered enterprise Linux server infrastructure across 15+ bare-metal and cloud nodes, managing kernel parameters, firewall rules, and IPsec VPN connectivity via Ansible.
- Deployed and monitored Asterisk VoIP telephony clusters and centralized FreeIPA identity management (LDAP/Kerberos/PKI).

DevOps & GCP Engineer • [Vizzn Inc](#)

Aug 2023 – Feb 2025 • Remote (Canada)

- Optimized 8+ CI/CD delivery pipelines, **reducing execution times from 18 to 7 minutes** while integrating DRATA automated compliance checks for SOC 2 readiness.
- Migrated legacy monolithic services into containerized microservices on modern Linux and cloud instances, **improving system throughput by 50%**.
- Maintained cloud monitoring and log analytics, executing zero-downtime database upgrades within scheduled maintenance windows.

DevOps & Software Engineer • [Code Informatics](#)

Feb 2021 – May 2022 • Remote

- Established initial CI/CD automation practices with Jenkins and GitHub, containerized 5+ services with Docker, and implemented ELK Stack monitoring.

EDUCATION & ACADEMIC BACKGROUND

BS in Software Engineering

2017 – 2021

COMSATS Institute of Information Technology, Islamabad

- **Final Year Project:** Dual-Axis Automated Solar Tracking Optimization System
