 +92 317 694 7473

 Lahore, Pakistan (100% Remote)

Results-driven Senior DevOps Engineer with 5+ years of hands-on experience architecting scalable CI/CD delivery pipelines using **GitHub Actions**, test-driven deployment (TDD), multi-language build automation, and Infrastructure as Code (IaC). Proven track record orchestrating build, package, and release lifecycles across **C++ (CMake)**, **JavaScript/TypeScript (NPM registries)**, and cross-platform desktop/mobile distributions. Expert in Docker containerization, multi-stage image optimization, Linux systems administration, networking, and high-availability zero-trust infrastructure across cloud and distributed environments. Experienced supporting security-sensitive fintech, sovereign AI, and high-throughput microservices.

🔧 CORE COMPETENCIES & TECHNICAL SKILLS

 **CI/CD & RELEASE ENGINEERING**

 GitHub Actions (Reusable / Matrix)

Test-Driven Deployment (TDD)

Semantic Versioning (SemVer)

Artifact Signing & Tagging

Mobile/Desktop Release Automation

 **MULTI-LANGUAGE BUILD SYSTEMS**

 CMake & Native Toolchains

C++ Compilation & Linkage

 Node.js & TypeScript

 NPM / Registry Workflows

Cross-Platform Builds

CONTAINERS & MICROSERVICES

Docker (Multi-Stage Builds)

Layer Caching & Optimization

GHCR / Docker Hub / ACR

 Kubernetes (AKS / K3s)

Container Hardening

INFRASTRUCTURE AS CODE & SCRIPTING

 Terraform

 Ansible Roles/
Playbooks

 Bash
Scripting

 Python
Automation

AWS CloudFormation

LINUX SYSTEMS & NETWORKING

Ubuntu / Debian / RHEL

Kernel Tuning & Storage

TCP/IP, DNS, Routing

Firewalls (iptables/UFW)

Site-to-Site IPsec VPNs

OBSERVABILITY, SRE & SECURITY

 Prometheus

 Grafana
Dashboards

ELK Stack (Logging)

Shift-Left SAST/DAST

SOC 2 (AzureProof Automation)

PROFESSIONAL EXPERIENCE

Senior DevOps & Cloud Engineer • [IBHC.ai \(Inception AI\)](#)

Sep 2025 – Present • Remote / Hybrid

- Architect and manage end-to-end multi-stage **GitHub Actions** and Azure DevOps CI/CD delivery pipelines for distributed enterprise platforms (**DGE-Mawaheb, Takafo, Muqabla, and RestHero**).
- Implemented test-driven deployment (TDD) pipelines with automated unit testing, integration gates, and container security scanning, shipping verified releases in under 10 minutes.
- Optimized Docker container builds utilizing multi-stage Dockerfiles and layer caching, **cutting image sizes by 65% and build durations by 50%**.
- Automated cloud infrastructure provisioning via modular **Terraform** and **Ansible** playbooks, guaranteeing reproducible isolated environments (Dev, Staging, Production, DR).
- Embedded automated security compliance validation using **AzureProof**, scanning live configurations against zero-trust standards and cutting SOC 2 audit preparation from days to hours.
- Unified production telemetry with Prometheus, Grafana, and Log Analytics, **reducing incident MTTR by 60%** across high-throughput services.

Senior DevOps & Infrastructure Engineer • [Aslase](#)

Jul 2025 – Present • Remote / Hybrid

- Built automated continuous integration and delivery pipelines for microservices and AI workloads, **reducing release cycle times by 40%**.
- Managed JavaScript/TypeScript build, linting, packaging, and versioning pipelines, ensuring seamless automated distribution to internal package registries and NPM workflows.
- Maintained Docker Compose and containerized production environments, reverse proxies (Nginx), and automated SSL/TLS certificate lifecycles, maintaining a **99.9% uptime SLA**.
- Standardized cross-platform application release workflows, including artifact verification, automated semantic tagging, and tag-triggered deployment pipelines.

Infrastructure & Systems DevOps Engineer • [THINK Surgical](#)

Feb 2023 – Dec 2023 • Remote (USA)

- Engineered and maintained **C++ native build pipelines using CMake** and GCC/Clang toolchains for surgical robotics engineering software.
- Automated multi-target compilation, unit testing, and artifact distribution across Linux environments.
- Provisioned physical VMware hypervisors and Linux virtual machines using modular **Ansible playbooks**, **slashing environment setup times from 3 hours to 15 minutes**.
- Authored Software Validation Protocols (SVP) and Verification Reports (SVR) satisfying FDA 21 CFR Part 11 regulatory standards for mission-critical software.

On-Premise & Cloud Infrastructure Engineer • [Technonies](#)

Mar 2022 – Oct 2024 • Remote

- Automated multi-node Kubernetes cluster bootstrapping and GitOps workflows on Hetzner Cloud, **cutting cluster deployment from 4 hours to under 20 minutes**.
- Engineered zero-downtime high-availability database clusters (**PostgreSQL Patroni & MariaDB Galera**), achieving **99.95% database availability**.
- Configured Linux system baselines, kernel tuning, firewall policies, and IPsec VPN connectivity across 15+ nodes using Ansible.
- Administered FreeIPA centralized directory services (LDAP/Kerberos/PKI) and Asterisk VoIP clusters.

DevOps & GCP Engineer • [Vizzn Inc](#)

Aug 2023 – Feb 2025 • Remote (Canada)

- Designed and optimized 8+ GitHub Actions CI/CD workflows, **reducing average pipeline duration from 18 to 7 minutes**.
- Containerized legacy monolithic services into decoupled microservices, **improving system throughput by 50%**.
- Managed zero-downtime distributed database migrations within 30-minute scheduled maintenance windows.

DevOps & Software Engineer • [Code Informatics](#)

Feb 2021 – May 2022 • Remote

- Established initial CI/CD automation practices using Jenkins and GitHub, containerized 5+ applications with Docker, and implemented ELK Stack monitoring.

BS in Software Engineering

2017 - 2021

COMSATS Institute of Information Technology, Islamabad

- **Final Year Project:** Dual-Axis Automated Solar Tracking Optimization System.
