DevOps Engineer with 5+ years of experience setting up CI/CD pipelines, containerizing applications, and maintaining Linux infrastructure. Hands-on experience building automated build and release workflows with **GitHub Actions**, managing **Docker** containers, maintaining **C++ (CMake)** builds, and packaging **JavaScript/TypeScript** applications. Proven background delivering secure, reliable infrastructure for enterprise projects including UAE Government initiatives (**DGE-Mawaheb**), commercial AI platforms (**Takafo, Muqabla**), and medical robotics software.

🔧 TECHNICAL SKILLS

🔗 CI/CD & BUILD TOOLS

GitHub
Actions

CMake & C++

TypeScript /

WORK EXPERIENCE

DevOps Engineer • [IBHC.ai \(Inception AI\)](#)

Sep 2025 – Present • Remote

- Built and managed GitHub Actions and Azure DevOps pipelines for production platforms including **DGE-Mawaheb (UAE Government)**, **Takafo**, **Muqabla**, and **RestHero**, keeping release times under 10 minutes.
- Set up automated testing, container security checks, and deployment gates to catch bugs before code reached staging or production.
- Rebuilt Docker images with multi-stage builds and layer caching, reducing image sizes by 65% and speeding up pipeline runs.
- Wrote modular Terraform and Ansible scripts to provision and manage cloud infrastructure across development, staging, and production environments.
- Monitored services with Prometheus and Grafana dashboards, resolving production alerts and maintaining 99.9% uptime for Takafo.
- Supported SOC 2 compliance readiness using AzureProof to run automated checks against live infrastructure configurations.

DevOps & Infrastructure Engineer • [Aslase](#)

Jul 2025 – Present • Remote

- Handled CI/CD pipelines, Docker environments, and server operations for client platforms including **ASMS (Skyworth USA)**, **Black Door Limo**, and **Humentra.ai**.
- Automated build, test, and release workflows for **TypeScript** and **Node.js** packages to internal registries with automated version tagging.
- Managed Docker Compose setups on Linux servers, configured Nginx reverse proxies, and automated SSL certificate renewals.
- Set up tag-triggered GitHub release workflows to automate cross-platform application artifact distribution.
- Handled routine Linux server maintenance, security patches, and application monitoring to maintain 99.9% uptime.

DevOps & Systems Engineer • THINK Surgical

Feb 2023 – Dec 2023 • Remote

- Maintained native **C++ build pipelines using CMake**, GCC, and Clang on Linux test environments for surgical robotics software.
- Automated test execution and binary artifact packaging as part of continuous integration runs.
- Wrote Ansible playbooks to configure Linux test machines and VMware virtual machines, reducing setup time from hours to minutes.
- Maintained software verification protocols (SVP/SVR) aligned with FDA 21 CFR Part 11 requirements for mission-critical medical systems.

Infrastructure & Linux Engineer • Technonies

Mar 2022 – Oct 2024 • Remote

- Managed Linux servers (Ubuntu/Debian) across bare-metal and cloud environments, handling user permissions, firewalls, and network routing.
- Automated server setup, security baselines, and routine maintenance using Bash scripts and Ansible.
- Maintained high-availability PostgreSQL and MariaDB databases, including automated backups and replication checks.
- Assisted with Kubernetes cluster deployments and set up system monitoring with Prometheus and Grafana.

DevOps Engineer • Vizzn Inc

Aug 2023 – Feb 2025 • Remote

- Maintained and optimized CI/CD workflows, reducing pipeline wait times from 18 minutes to 7 minutes.
- Assisted in containerizing monolithic services into Docker containers running on cloud instances.
- Monitored services, resolved deployment failures, and documented incident resolutions.

Junior DevOps Engineer • Code Informatics

Feb 2021 – May 2022 • Remote

- Set up initial automated build and test pipelines using Jenkins and GitHub.
- Created Dockerfiles to containerize internal tools and set up centralized logging with the ELK stack.

EDUCATION

BS in Software Engineering

2017 – 2021

COMSATS Institute of Information Technology, Islamabad

- Final Year Project: Dual-Axis Automated Solar Tracking Optimization System
