Pakistan

DevOps Engineer with 5+ years of experience setting up CI/CD pipelines, containerizing applications, and maintaining Linux infrastructure. Hands-on experience building automated build and release workflows with **GitHub Actions**, managing **Docker** containers, maintaining **C++ (CMake)** builds, and packaging **JavaScript/TypeScript** applications. Pragmatic approach to Infrastructure as Code (Terraform, Ansible), system reliability, and cross-platform application releases.

WORK EXPERIENCE

DevOps Engineer • [IBHC.ai](#)

Sep 2025 – Present • Remote

- Built and maintained **GitHub Actions** pipelines to automate builds, testing, and deployments, cutting release times to under 10 minutes.
- Rebuilt Docker images with multi-stage builds and layer caching, reducing image sizes by 65% and speeding up pipeline runs.
- Automated server and cloud environment provisioning using **Terraform** and **Ansible** across dev, staging, and production.
- Monitored application health and server performance using **Prometheus** and **Grafana** dashboards, resolving production alerts promptly.
- Worked closely with developers to debug pipeline failures, dependency issues, and deployment bottlenecks.

DevOps & Infrastructure Engineer • [Aslase](#)

Jul 2025 – Present • Remote

- Automated build, test, and release workflows for **TypeScript** and **Node.js** packages to internal registries with automated version tagging.
- Managed Docker Compose setups on Linux servers, configured Nginx reverse proxies, and automated SSL certificate renewals.
- Set up tag-triggered GitHub release workflows to automate application artifact distribution.
- Handled routine Linux server maintenance, security patches, and application monitoring to maintain 99.9% uptime.

DevOps & Systems Engineer • THINK Surgical

Feb 2023 – Dec 2023 • Remote

- Maintained native **C++ build pipelines using CMake**, GCC, and Clang on Linux test environments.
- Automated test execution and binary artifact packaging as part of continuous integration runs.
- Wrote Ansible playbooks to configure Linux test machines and VMware virtual machines, reducing setup time from hours to minutes.
- Documented build configurations, environment setups, and release steps for the engineering team.

Infrastructure & Linux Engineer • Technonies

Mar 2022 – Oct 2024 • Remote

- Managed Linux servers (Ubuntu/Debian) across bare-metal and cloud environments, handling user permissions, firewalls, and network routing.
- Automated server setup, security baselines, and routine maintenance using Bash scripts and Ansible.
- Maintained high-availability PostgreSQL and MariaDB databases, including automated backups and replication checks.
- Assisted with Kubernetes cluster deployments and set up system monitoring with Prometheus and Grafana.

DevOps Engineer • Vizzn Inc

Aug 2023 – Feb 2025 • Remote

- Maintained and optimized CI/CD workflows, reducing pipeline wait times from 18 minutes to 7 minutes.
- Assisted in containerizing monolithic services into Docker containers running on cloud instances.
- Monitored services, resolved deployment failures, and documented incident resolutions.

Junior DevOps Engineer • Code Informatics

Feb 2021 – May 2022 • Remote

- Set up initial automated build and test pipelines using Jenkins and GitHub.
- Created Dockerfiles to containerize internal tools and set up centralized logging with the ELK stack.

EDUCATION

BS in Software Engineering

2017 – 2021

COMSATS Institute of Information Technology, Islamabad

- Final Year Project: Dual-Axis Automated Solar Tracking Optimization System
