 +92 317 694 7473

 Lahore, Pakistan

Senior Linux & Database Infrastructure Engineer with 5+ years of hands-on experience designing, automating, and maintaining enterprise Linux operating systems (RHEL, Ubuntu, CentOS), high-availability database clusters, and multi-cloud platforms across Microsoft Azure, AWS, GCP, and bare-metal hypervisors. Specialized in zero-downtime database architectures (**HA PostgreSQL with Patroni/pgpool & CloudNativePG, MariaDB Galera clusters, MySQL, Oracle DB infrastructure**), automated configuration management via **Ansible** and **Terraform**, container orchestration with **Docker** and **Kubernetes**, and end-to-end telemetry using **Prometheus** and **Grafana**.

CORE COMPETENCIES & TECHNICAL SKILLS

 **LINUX SYSTEMS ENGINEERING**

 RHEL / CentOS

 Ubuntu Server

 Debian

 Kernel Tuning / LVM

 FreeIPA (LDAP/Kerberos)

 Systemd / PAM

 **HIGH-AVAILABILITY DATABASES**

 PostgreSQL (Patroni)

 MariaDB Galera Cluster

 CloudNativePG Operator

 MySQL Replication

 Oracle DB Support

 Redis

PROFESSIONAL EXPERIENCE

Senior DevOps & Azure Cloud Engineer • [IBHC.ai \(Inception AI\)](#)

Sep 2025 – Present • Abu Dhabi, UAE (Remote / Hybrid)

- Lead enterprise Linux, database, and cloud infrastructure operations for high-profile government and commercial platforms (**DGE-Mawaheb**, **Takafo**, **Muqabla**, and **RestHero**).
- Architected and operate resilient Azure and AWS infrastructures featuring isolated VNets, Private Endpoints, HA PostgreSQL, Redis caching, GPU VM compute, and Azure Key Vault.
- Designed automated backup, disaster recovery (DR), and multi-stage CI/CD deployment pipelines using Azure DevOps and GitHub Actions, delivering releases in under 10 minutes.
- Implemented full-stack observability with Prometheus, Grafana, and Log Analytics, **reducing production MTTR by 60%**.

Senior DevOps & Infrastructure Engineer • [Aslase](#)

Jul 2025 – Present • Hybrid

- Administer production Linux servers (Ubuntu/Debian) and containerized database workloads across 8+ commercial platforms including **aslaschat.ai** and **qudra-tech.ai**.
- Manage Docker Compose environments, automated database backups, system updates, and Nginx reverse proxies with SSL/TLS lifecycle automation.
- Engineered automated CI/CD and deployment workflows, **reducing release cycles by 40%** while sustaining a **99.9% uptime SLA**.
- Completed zero-downtime cloud infrastructure migrations from legacy hosting environments within two weeks.

On-Premise & Cloud Infrastructure Engineer • [Technonies](#)

Mar 2022 – Oct 2024 • Remote

- **High-Availability Database Engineering:** Architected and administered zero-downtime **MariaDB Galera multi-master clusters** and **HA PostgreSQL (Patroni + pgpool)** clusters, sustaining **99.95% database availability**.
- **Linux Systems & Directory Administration:** Deployed and managed enterprise **FreeIPA (centralized LDAP, Kerberos authentication, and PKI)**, 50+ agent Vicidial call center cluster (Asterisk VOIP), Postfix/Dovecot mail servers, and Frappe ERPNext on bare-metal Linux.
- **Kubernetes & Database Operators:** Automated multi-node Kubernetes cluster provisioning on Hetzner Cloud using ArgoCD GitOps and **CloudNativePG operator**, reducing provisioning times from 4 hours to under 20 minutes.
- **Infrastructure Automation:** Authored modular **Ansible playbooks** automating OS hardening, system patching, and Prometheus/Grafana monitoring rollouts across 15+ nodes.

DevOps & GCP Engineer • [Vizzn Inc](#)

Aug 2023 – Feb 2025 • Remote (Canada)

- Modernized legacy monolithic server applications to containerized microservices on modern Ubuntu and GCP infrastructure, **improving system throughput by 50%**.
- Executed Dgraph distributed database major version upgrades and cluster migrations with zero data loss within a 30-minute maintenance window.
- Administered GCP Cloud Monitoring and Logging across 5+ services; optimized 8+ CI/CD pipelines, cutting runtimes from 18 to 7 minutes.

Infrastructure & VMware DevOps Engineer • THINK Surgical

Feb 2023 – Dec 2023 • Remote (USA)

- Administered physical **VMware ESXi hypervisors** and virtual machine lifecycles across 20+ virtual servers for medical robotics R&D.
- Automated host provisioning, Linux OS configurations, and user environments with Ansible, **cutting setup times from 3 hours to 15 minutes**.
- Integrated Arctic Wolf Agent for continuous 24/7 threat monitoring; authored FDA 21 CFR Part 11 compliant system verification reports (SVP/SVR).

DevOps & Azure Engineer • Code Informatics

Feb 2021 – May 2022 • Remote

- Standardized Linux application environments using Docker and automated build pipelines via Jenkins.
- Deployed centralized ELK Stack (Elasticsearch, Logstash, Kibana) for system log aggregation and server performance metrics.

EDUCATION & ACADEMIC RESEARCH

BS in Software Engineering

2017 – 2021

COMSATS Institute of Information Technology, Islamabad

- **Final Year Project:** Dual-Axis Automated Solar Tracking Optimization System.
