🏠 Microsoft Azure • Entra ID • SRE • Landing Zones

Senior DevOps & Azure Cloud Engineer with 5+ years of experience architecting, securing, and operating enterprise-grade cloud environments across Azure, AWS, and GCP. Proven track record leading hybrid-cloud migrations, building automated Azure DevOps and GitHub Actions CI/CD pipelines, managing Kubernetes workloads, and enforcing zero-trust security across multi-tenant government and commercial ecosystems. Deep specialization in Microsoft Entra ID (Azure AD), Azure Landing Zones, SRE observability, and compliance automation.

⚙️ CORE COMPETENCIES & TECHNICAL SKILLS

🏠 MICROSOFT AZURE ECOSYSTEM

Azure Landing Zones

VNet / NSG / Firewall

App Gateway / Front Door

AKS / App Services

Key Vault / Defender

Sentinel

🛡️ IDENTITY, GOVERNANCE & ZERO-TRUST

Microsoft Entra ID

Conditional Access

PIM (Privileged Access)

RBAC & Managed IDs

SOC2 (AzureProof)

AWS WAF / Arctic Wolf

CI/CD, GITOPS & IAC

 Azure DevOps

 GitHub Actions

 ArgoCD

 Terraform

 Ansible

ARM / Bicep

OBSERVABILITY, SRE & TELEMETRY

Azure Monitor

Log Analytics

Application Insights

 Prometheus

 Grafana

ELK Stack

MULTI-CLOUD & HYPERVISORS

 AWS

 GCP

 Hetzner Cloud

 VMware ESXi

 Proxmox VE

HIGH-AVAILABILITY DATABASES

 PostgreSQL (Patroni)

 MariaDB Galera

 CloudNativePG

Dgraph / MongoDB

PROFESSIONAL EXPERIENCE

Senior DevOps & Azure Cloud Engineer • [IBHC.ai \(Inception AI\)](#)

Jul 2025 – Present • Abu Dhabi (Remote)

- Own end-to-end Microsoft Azure infrastructure for the IBHC.ai platform, managing multi-subscription environments governed with Entra ID, Conditional Access policies, PIM, and RBAC across dev, staging, and production tiers.
- Deployed and manage the **DGE-Mawaheb** demo environment as a Docker Compose service on Azure VMs with automated GitHub Actions pipelines, shipping demo releases in under 10 minutes on every main branch push.
- Architected multi-stage Azure DevOps release pipelines for DGE-Mawaheb (UAE government initiative), integrating automated validation, environment gates, and instant rollback capabilities.
- Implemented centralized monitoring across all IBHC workloads using Azure Monitor, Log Analytics, and Application Insights, **reducing MTTR by 60%** through proactive alerting.
- Enforced automated SOC2 compliance posture via **AzureProof**, scanning live Azure infrastructure against control definitions and reducing manual audit preparation from days to hours.

Senior DevOps & Azure Engineer • [Aslase](#)

Jul 2025 – Present • Hybrid

- Deployed and manage 8+ client platforms on Microsoft Azure, **shortening release cycles by 40%** via GitHub Actions and Docker Compose on Azure VMs.
- Engineered full AWS deployment for `resthero.io` (Amplify + Elastic Beanstalk), automated releases with AWS CodePipeline, and secured applications with AWS WAF, **dropping manual deployment effort by 70%**.
- Manage MLOps infrastructure for 3 high-profile AI platforms: `aslaschat.ai`, `qudra-tech.ai`, and the Takafo initiative (Cognit & Mubadala partnership), sustaining a **99.9% uptime SLA**.
- Led complete zero-downtime Azure migrations and decommission of `core42app` and `mineralenergy.ae` from legacy cPanel environments within 2 weeks.

DevOps & GCP Engineer • [Vizzn Inc](#)

Aug 2023 – Feb 2025 • Remote (Canada)

- Led legacy Borger application migration to modern Ubuntu instances, **improving system throughput by 50%** and eliminating recurring outages.
- Administered GCP Cloud Monitoring and Logging across 5+ microservices; executed Dgraph major version upgrade with zero data loss within a 30-minute maintenance window.
- Optimized 8+ GitHub Actions CI/CD workflows, **reducing average pipeline duration from 18 to 7 minutes**; executed DRATA automated compliance suites for SOC2 readiness.

On-Premise & Cloud Infrastructure Engineer • [Technonies](#)

Mar 2022 – Oct 2024 • Remote

- Automated Kubernetes cluster provisioning on Hetzner Cloud using ArgoCD GitOps, **dropping deployment time from 4 hours to under 20 minutes**.
- Engineered zero-downtime MariaDB Galera and HA PostgreSQL (Patroni + pgpool) database clusters, sustaining **99.95% database availability**.
- Authored Ansible playbooks automating Kubernetes and monitoring stack deployments across 15+ nodes; utilized Proxmox VE locally for pre-flight testing.
- Deployed 50+ agent Vicidial call center cluster (Asterisk VOIP), FreeIPA identity management, Frappe ERPNext, and Postfix/Dovecot mail servers.

Infrastructure & VMware DevOps Engineer • THINK Surgical

Feb 2023 – Dec 2023 • Remote (USA)

- Managed VMware ESXi physical hypervisor infrastructure and VM lifecycles across 20+ virtual machines for medical robotics R&D.
- Deployed multi-user JupyterHub platform; automated host provisioning via Ansible, **reducing server setup times from 3 hours to 15 minutes.**
- Integrated Arctic Wolf Agent for continuous 24/7 threat detection; migrated TeamCity CI servers with 100% build history retention.
- Authored Software Validation Protocols (SVP) and Verification Reports (SVR) adhering to strict FDA 21 CFR Part 11 medical software requirements.

DevOps & Azure Engineer • Code Informatics

Feb 2021 – May 2022 • Remote

- Established company CI/CD frameworks, designed Jenkins pipelines, and deployed ELK Stack for centralized log monitoring.
- Led Azure cloud infrastructure rollout for new product launch, **cutting deployment duration from 2 days to under 1 hour.**

EDUCATION & ACADEMIC RESEARCH

BS in Software Engineering

2017 – 2021

COMSATS Institute of Information Technology, Islamabad (2017 – 2021)

- **Final Year Project:** Dual-Axis Automated Solar Tracking Optimization System.
- **Academic Research:** Empirical statistical research study conducted for BZU University.
