

Anas

Senior DevOps & Multi-Cloud Infrastructure Engineer

✉ anas.devops@hotmail.com

📍 Multi-Region / Remote & Hybrid

☁ AWS • Azure • GCP • Kubernetes • AI/MLOps

Senior DevOps & Multi-Cloud Engineer with a proven track record of architecting, automating, and operating high-availability infrastructure across AWS, Microsoft Azure, and GCP. Deep expertise leading complex hybrid-cloud migrations, modernizing legacy systems, engineering CI/CD and GitOps pipelines, and deploying high-performance AI/MLOps infrastructure for government and enterprise client platforms.

🔧 CORE COMPETENCIES & TECHNICAL SKILLS

 **CLOUD PLATFORMS**

 AWS

 Microsoft Azure

 GCP

 DigitalOcean

 Proxmox

 **CONTAINERS & ORCHESTRATION**

 Kubernetes (EKS/ AKS)

 Docker / Compose

 K3s / K3d

 ArgoCD GitOps

 K9s

 **CI/CD & AUTOMATION**

 GitHub Actions

 AWS CodePipeline

 Jenkins

 Ansible

 Terraform

 **AI / MLOPS & HIGH-AVAILABILITY DATA**

 JupyterHub

 MLOps Runtimes

 PostgreSQL / Patroni

 MariaDB Galera

 CloudNativePG

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer • [Aslase](#)

Jul 2025 – Present • Hybrid

- Lead the architecture, deployment, and end-to-end management of complex cloud infrastructure for high-value government and commercial clients across the region.
- **Azure Platform & CI/CD:** Architected and manage multi-client environments on Microsoft Azure (including `ibhc.ai`). Engineered automated CI/CD workflows using GitHub Actions; deployed containerized demo environments via Docker Compose on Azure VMs (`dge-mawaheb`).
- **AWS Platform & Security:** Engineered end-to-end AWS deployment for `resthero.io` utilizing AWS Amplify for frontend and AWS Elastic Beanstalk for backend; automated releases with AWS CodePipeline and reinforced application edge security via AWS WAF.
- **AI & MLOps Infrastructure:** Manage production infrastructure, containerized inference runtimes, and telemetry for prominent AI platforms including `aslaschat.ai`, `qudra-tech.ai`, and the `takafo` sovereign AI initiative (Cognit & Mubadala partnership).
- **Complex Cloud Migrations:** Led the total decommissioning and migration of `core42app` into modern Azure tenants; successfully migrated legacy cPanel environments (`mineralenergy.ae`) to modern cloud infrastructure.
- **Full-Stack Observability:** Provide centralized logging and performance telemetry across enterprise client fleets (including `blackdoorlimo.com`).

Senior DevOps Engineer • [HCMS.ai \(Human Capital Management System\)](#)

Jul 2025 – Present • Remote

- Own the complete cloud infrastructure architecture and DevOps lifecycle for the HCMS.ai enterprise SaaS application.
- **Hybrid-Cloud Migration & Consolidation:** Planned and executed a complex migration of the staging ecosystem—previously split across AWS and Azure—consolidating all workloads, databases, and microservices into a unified Microsoft Azure portal.
- **Platform Reliability & Security:** Enforced automated CI/CD deployment gates, high-availability multi-zone configurations, and unified Prometheus/Grafana observability.

DevOps Engineer • [Vizzn Inc](#)

Aug 2023 – Feb 2025 • Remote (Canada)

- **Legacy Migration:** Directed the full migration of the critical 'Borger' application to a modern Ubuntu platform, elevating system security, stability, and runtime efficiency.
- **GCP & Data Observability:** Managed telemetry on GCP; spearheaded Dgraph database migration and version upgrades with zero data loss; tuned Google Cloud Pub/Sub topic throughput.
- **CI/CD & Governance:** Optimized GitHub Actions pipelines for faster execution; conducted automated DRATA compliance testing to ensure strict regulatory audit readiness.

DevOps Engineer • [Technonies](#)

Mar 2022 – Oct 2024 • Remote

- **Kubernetes & GitOps:** Automated multi-cluster rollouts using ArgoCD GitOps and managed containerized database lifecycles using CloudNativePG and MariaDB operators.
- **High-Availability Data:** Engineered zero-downtime MariaDB Galera clusters with Docker and high-availability PostgreSQL clusters using Patroni and pgpool.
- **Infrastructure as Code:** Created modular Ansible automation playbooks to bootstrap Kubernetes nodes and deploy complete Prometheus & Grafana observability stacks.
- **Enterprise Services:** Deployed high-availability Vicidial call center infrastructure (Asterisk VOIP), FreeIPA identity management, Frappe ERPNext, and Postfix/Dovecot secure mail infrastructure.

DevOps Engineer • [THINK Surgical](#)

Feb 2023 – Dec 2023 • Remote (USA)

- **JupyterHub Platform:** Deployed and operated a scalable multi-user JupyterHub platform for medical robotics R&D and data analysis.
- **Automation & Threat Detection:** Automated Ubuntu provisioning with Ansible and integrated Arctic Wolf Agent for 24/7 continuous threat monitoring.
- **CI/CD Migration & Medical Compliance:** Migrated TeamCity CI server configurations; authored Software Validation Protocols (SVP) and Verification Reports (SVR) compliant with FDA regulations.

DevOps Engineer • Code Informatics

Feb 2021 – May 2022 • Remote

- Established DevOps pipelines and deployed full-stack application workloads on Microsoft Azure.
- Engineered automated Jenkins pipelines integrating Gradle and Grunt build automation tools.
- Deployed centralized ELK Stack for real-time application and server log analysis.

EDUCATION & ACADEMIC RESEARCH

BS in Information Technology

2017 – 2021

COMSATS Institute of Information Technology (2017 – 2021)

- **Final Year Project:** Dual-Axis Automated Solar Tracking Optimization System.
- **Academic Thesis:** Hypothesis-driven statistical research study conducted for BZU University.
